WORK EXPERIENCE

Doximity / *Android Product Designer*

SEPTEMBER 2019 - PRESENT

I was the first dedicated designer for Doximity's Android app. I worked with developers and the iOS design team to better implement and leverage Android's material design system on new features and refining existing features.

Doximity / *UX Designer and Frontend Developer*

APRIL 2015 - AUGUST 2019

I worked as part of several interdisciplinary teams to create and implement new features on Doximity's news products and emails. Because of my experience with development I was able to fully implement these designs in production.

Duda / *Frontend Developer*

OCTOBER 2013 - JANUARY 2015

I was fully responsible for all maintenance and development of the marketing site, Wordpress blog and marketing emails. I was also responsible for QA on the marketing site and blog and was able to automate most of that process through Ruby and Selenium.

Duda / *Technical Support Specialist*

NOVEMBER 2011 - OCTOBER 2013

I utilized my understanding of CSS, HTML, and Javascript to resolve technical support requests. I trained other support specialists in these areas to help them better assist customers. I reported and resolved top tier bugs with QA and developers while managing customer expectations and concerns. I themed, wrote, edited and maintained Duda's support knowledge base.
