WORK EXPERIENCE

Doximity / *Senior Android Product Designer*

MAY 2022 - PRESENT

Sole designer for the Android app, working with every product team and an 8+ person Android engineering team to set design direction platform-wide. Independently led the migration from Material 2 to Material 3 design, updating the component library and visual language across every surface. Partnering with engineering to define the app's component system through its Jetpack Compose transition. The app has held a 4.7+ Play Store rating throughout.

Doximity / *Android Product Designer*

SEPTEMBER 2019 - MAY 2022

First dedicated Android designer at the company. Defined the app's Material Design language and raised Android from an iOS port to a first-class platform, shipping new features on platform-native patterns. Led the 5-person mobile design team's move from Sketch to Figma; the component libraries built for it now serve the 20+ person design org.

Doximity / *UX Designer and Frontend Developer*

APRIL 2015 - AUGUST 2019

Designed and personally shipped production features across Doximity's news products and emails as part of cross-disciplinary teams, owning work from concept through frontend implementation (HTML/CSS/Rails).

Duda / *Frontend Developer*

OCTOBER 2013 - JANUARY 2015

Owned development and maintenance of the marketing site, blog, and marketing emails; automated site QA with Ruby and Selenium.

Duda / *Technical Support Specialist*

NOVEMBER 2011 - OCTOBER 2013

Resolved technical support cases requiring HTML/CSS/JavaScript; trained the support team on frontend debugging and maintained the knowledge base.
